"Emerging Data Scientist with strong academics, industry exposure, and proven leadership in projects, events, and innovation."

📄 Professional Summary

Motivated second-year Data Science student with consistent academic excellence. Cumulative SGPI (till Sem 3): ~9.3 and hands-on experience in machine learning, deep learning, and business intelligence. Skilled in Python, R, SQL, Power BI, and statistical modelling, with industry exposure through Cloud Counselage Pvt.Ltd. internship and L&T tie-up projects. Published multiple projects on GitHub with professional documentation, including dashboards and classification models. Recognized for leadership as Class Representative, strong communication and management skills, and risk-taking initiative—currently preparing to present an AI project with team collaboration at a national tech event in January 2026.

🎓 Education

B.K. Birla College of Arts, Science & Commerce
Bachelor of Science in Data Science

- **First Year (FY):** 2024
- **Second Year (SY):** 2025 (current)
- **Third Year (TY):** Expected Graduation – 2027
- SGPI: Sem 1 – 9.36 Sem 2 – 9.23 Sem 3 – 9.27
- **Cumulative SGPI (till Sem 3): ~9.28**

🛠 Technical Skills

- **Programming:** Python, R, C++, PHP, SQL, HTML, CSS
- **Data Science & Analytics:** Data Analysis, Statistical Modelling, Inferential Statistics, Numerical Methods, Data Structures & Algorithms (DAA)
- **Machine Learning & AI:** Supervised & Unsupervised Learning, Feature Engineering, Deep Learning, Artificial Intelligence (AI), EIDS
- **Visualization & BI Tools:** Power BI, Matplotlib, Seaborn
- **Productivity Tools:** Microsoft Excel, Word, PowerPoint (Presentations)
- **Other:** GitHub integration, Markdown documentation

Projects

Power BI Dashboard – Student Economic Background & Academic Insights
Designed an interactive dashboard analyzing student demographics and academic performance. Visualized trends using bar charts, pie charts, and tree maps to highlight correlations between economic background and academic outcomes.
Tools: Power BI, Data Modeling, Visualization

Power BI Dashboard – Trade Data Insights
Built a dashboard to analyze global trade metrics including imports, tariffs, average distance, and concentration index. Delivered actionable insights through interactive visuals for comparative analysis across countries.
Tools: Power BI

Computer Architecture – Coursework & Mini Project
Explored fundamental concepts of computer organization and architecture through simulations of CPU design, instruction sets, memory hierarchy, and pipeline processing. As part of the mini-project, implemented an **Email Spam Classification** algorithm using text preprocessing (tokenization, stop-word removal, feature extraction) and trained ML models to evaluate accuracy and precision. Documented both system-level and applied ML workflows with structured reports and visual diagrams, demonstrating algorithmic thinking and practical application.
Tools: C++, Assembly basics, Simulation frameworks, Python, Scikit-learn, NLP techniques

Machine Learning Basics – Titanic Kaggle Dataset
Predicted survival outcomes using the Titanic dataset in Google Colab. Performed data preprocessing (handling missing values, feature encoding), exploratory analysis, and visualizations. Built classification models (Naive Bayes, Logistic Regression) and evaluated performance using accuracy and confusion matrix.
Tools: Python, Pandas, Matplotlib, Scikit-learn

California Housing Price Prediction – Scikit-learn Built-in Dataset
Applied regression techniques to predict housing prices. Explored feature relationships, built and compared simple, multiple, and polynomial regression models, and evaluated performance using R^2, MAE, and RMSE.
Tools: Python, Scikit-learn, Pandas, Matplotlib

Wine Quality Classification – UCI Repository
Classified wine quality using physicochemical properties of red wine. Built and evaluated KNN, Decision Tree, and SVM models using accuracy, precision, recall, and confusion matrices. SVM delivered strong predictive accuracy; Decision Tree offered interpretability.
Tools: Python, Scikit-learn, Pandas, Matplotlib

Customer Purchase Data – Unsupervised Learning Analysis
Applied clustering and dimensionality reduction to uncover hidden patterns in synthetic customer purchase data. Used K-Means and DBSCAN for segmentation and anomaly detection, and PCA for visualizing clusters.
Tools: Python, Scikit-learn, Pandas, Matplotlib

Breast Cancer Classification – Scikit-learn Built-in Dataset
Built and compared multiple ML models to classify breast cancer data using ensemble techniques. Used Decision Tree, Random Forest, AdaBoost, Gradient Boosting, and Voting Classifier. Selected best-performing model for deployment.
Tools: Python, Scikit-learn, Pandas, Matplotlib

💼 Experience

Data Science Intern — Cloud Counselage Pvt. Ltd.
August 2025 – Present

- Collaborated on industry-aligned projects applying machine learning and data visualization techniques.
- Built and published Power BI dashboards to analyze business insights and trends.
- Applied Python, SQL, and statistical methods for data preprocessing, feature engineering, and predictive modeling.
- Documented projects professionally in Word and GitHub, ensuring recruiter-ready deliverables.
- Contributed to team discussions and presented findings, strengthening communication and leadership skills.

🎖 Leadership & Achievements

- **Class Representative (2023–2025)**
  Trusted liaison between faculty and students for two consecutive years. Facilitated

academic communication, coordinated events, and built strong rapport across departments.

- **Inter-College Data Science Event Organizer**
  Led and coordinated events like *Kaggle Challenge* and *Data Shark*, promoting peer learning and technical collaboration. Managed logistics, outreach, and team coordination.
- **AI Project Presentation – National Tech Event (January 2026)**
  Selected to present a team-led AI project at a national-level tech symposium. Demonstrates innovation, risk-taking, and real-world application of machine learning.

📜 Certifications & Workshops

- Data Science Workshop – iFuture Technologies Pvt. Ltd.
- AI Workshop – NXT Wave
- Certificate of Attendance – Fullstack Development Insights (Edureka Internship Program)
- Certificate of Participation – AI-Powered Digital Marketing Webinar (Digital Scholar)
- Certificate of Participation – GenAI for Finance & Investment Banking Operations Webinar (FPA Edutech)
- Microsoft Code Without Barriers – AI Training Sessions

🎖 Achievements & Activities

- Appointment Letter – Cloud Counselage Pvt. Ltd. (Data Science Intern, August 2025 – Present)
- Organized and conducted inter-college data science events (*Kaggle Challenge*, *Data Shark*) with team collaboration.
- Mini Project – Email Spam Classification (Logistic Regression & supervised ML algorithms).
- Leadership as Class Representative (2023–2025), facilitating communication between faculty and peers.
- Selected to present AI project at a **National Tech Event (January 2026)**, showcasing innovation and teamwork.
